

Project Online migration | Overview

When you're planning your Project Online migration it's important to consider all of your options. In the infographic below, we've put together a comparator to other options that Microsoft has articulated that you can move to when Project Online is decommissioned.

When you're planning your Project Online data migration, what options are available to you?

Project Online migration | Planner

A lightweight task-management tool in Microsoft 365 designed for simple team planning and collaboration, using boards and tasks to track work at an individual or small-team level.

Strengths

- ✓ Simple to use, low barrier to entry.
- ✓ Extend with Power Platform capabilities.
- ✓ No desktop applications to install.
- ✓ Quick to implement.
- ✓ Excellent for small projects.

Limitations

- ✗ Lacks the maturity of Project Desktop.
- ✗ No time-phased forecasting capability.
- ✗ No baselining capability.
- ✗ No ability to capture RAID information.
- ✗ Limited enterprise control for the PMO.
- ✗ Need to migrate MS Project schedules and re-train staff.
- ✗ Limited enterprise resource management for the PMO.

Project Online migration | Project Server SE

An enterprise project and portfolio management platform (built on Microsoft Project) used to centrally manage complex projects, resources, schedules, and reporting across an organisation.

Strengths

- ✓ Retain MS Project for scheduling.
- ✓ Robust resource management capability.
- ✓ Minimal change impact – Users retain a familiar UX.
- ✓ Excellent solution for large, complex projects.

Limitations

- ✗ Legacy platform with no upgrades or enhancements.
- ✗ Only one scheduling tool available.
- ✗ Poor UX for end users.
- ✗ Customer must manage infrastructure.
- ✗ Limited configurability or tailoring ability.
- ✗ No ability to enhance UX with AI.
- ✗ High barrier to entry for users, notably desktop Project.
- ✗ Limited Program & Portfolio Management capability.

Project Online migration | Altus

A Microsoft-native Project and Portfolio Management (PPM) platform that helps organisations plan, prioritise, and govern work by providing a single, integrated view of projects, resources, and outcomes across the Microsoft 365 ecosystem.

Strengths

- ✓ Schedule agnostic – Use the most appropriate tool for the work.
- ✓ Robust PPM solution with Portfolio & Program Management capabilities.
- ✓ PaaS solution – You retain data sovereignty.
- ✓ Purpose built migration tools to enable a smooth transition from Project Online in days not months.
- ✓ Continue using Desktop MS Project for scheduling.
- ✓ Robust resource management.
- ✓ Strategic portfolio alignment and optimization capability.

Limitations

- ✗ PaaS solution requires M365 prerequisites to be met.
- ✗ Highly comprehensive solution may be too complex for some clients needs – If Project Online is too complex, Altus might not be the best fit for your needs.
